

SCORM/AICC based learning management system for schools

Link2School Learn is a highly sophisticated user-friendly SCORM/AICC based learning management system for K-12 schools. It provides best in class content management system, learner-centered learning management system and comprehensive assessment tools to manage the learning, teaching and knowledge sharing activities more efficiently and effectively. Its intuitive and user-friendly interface allows teachers/instructors to build and deploy course materials online and engage learners in an interactive way.

By incorporating the best and most advanced technologies, it provides seamless content connectivity, security, scalability, session management and integrated reporting. Its innovative and flexible system helps schools to complement their traditional teacher-led face-to-face teaching by enhancing online learning and teaching experience, and thus increasing the efficiency and productivity of the students and overall effectiveness of the institution.

Benefits

- Institution wide efficiencies for learning and development.
- Streamline administration and learning activities
- Ease of content creation, placement and access
- Ease of communication and collaboration
- Adaptive and personalized delivery
- Support for self-paced learning, virtual learning and blended learning
- Powerful tracking, reporting & LMS integration capabilities
- Customizable and expandable based on the needs
- Huge cost savings and better knowledge retention
- Reduce training time and travel hassles
- AICC and SCORM compliant
- Anytime, anywhere and any pace learning

Modules and Functionalities

Registration Management

- User-friendly and simple registration process
- Learner Self-enrollment
- Course Catalog
- Admin Approval Process

Content Management

- Built-in WYSIWYG editing tool (i-Author: Optional)
- Built-in Question authoring tool (i-Bank: Optional)
- Repository of reusable multimedia and learning objects
- Support for multiple type of learning documents
- Version control to track changes

Learner Management

- Courseware Management
- Learners Assignment Management
- Announcement, Alerts and Automated Notifications
- Detailed user activity and attendance report

Performance Management

- Content Usage Tracking
- Examinations and Test Management
- Bloom's Taxonomy Based Assessment

Collaboration Center

- Discussion Forums
- Chat
- E-mail
- Announcements
- Opinion Poll

User Management

- Add Users
- Assign Roles
- Set Permissions
