

We make
Technology
Work for your
schools

Today's Challenges

- Are you looking for ways to augment your institution's brand image?
- Do you wish to integrate and automate all your academic and administrative functions?
- Is scheduling time-table for your school daunting you?
- Do you want to adopt technology that engage students and drive students' success?
- Want to make your school's learning, teaching and knowledge sharing highly productive?
- Looking for a platform to involve parents in their wards' progress?

What WHBS can do?

WHBS brings innovative technological solutions for schools to enhance academic experience, complement educational offerings and achieve competitive advantage. Through the years of working with many distinguished educators, educational institutions and ministries of education worldwide, we have devised solutions and approaches to advance educational missions and goals.

Link2School solutions help schools meet today's rapidly changing and increasing demands of educational environment by:

- Enhancing academic experience (Educate)
- Ensuring students achievement (Assess)
- Improving education stakeholders engagement (Collaborate)
- Managing resources and operations efficiently (Manage)

What we offer?

Link2School Learn - Link2School Learn is a highly sophisticated user-friendly SCORM/AICC based learning management system for K-12 schools. It provides best in class content management system, learner-centered learning management system and comprehensive assessment tools to manage the learning, teaching and knowledge sharing activities more efficiently and effectively. Its innovative and flexible system helps schools to complement their traditional teacher-led face-to-face teaching by enhancing online educational experience.

Link2School Campus - Link2School Campus is a comprehensive campus management system for schools. It provides campus wide integrated system that automates and integrates institution's all the administrative functions. The centralized secured database of Link2school Campus provides granular controlled information to students, teachers, parents and administrators. The system allows all users to securely access what they need, when they need and provide easy access to the information.

Link2School EduSuite - Link2School EduSuite is an easy-to-use web-based learning, academic and campus management system for schools. Its integrated structure, modules and core database engine helps integrate and automate all the operations of the school, avoid redundancy of data and duplication of work, Thus resulting in efficient use of time, resources and cost.
